URBANSYSTEMS.

Costco Wholesale Stores, Alberta
Costco Wholesale

The Calgary branch of Urban Systems is now the Costco planning and engineering consultant for Alberta. Urban System's first project with Costco has been a warehouse relocation in South Calgary. Urban Systems worked with Costco and the rest of the consultant team towards obtaining development permit approvals for the project, as well as the site engineering design and landscaping design.

Currently, the Calgary and Edmonton branches are working with Costco on a development permit for a new warehouse in Edmonton, and on a feasibility study for a new warehouse location in Calgary.
